

Air Shield

Patented

By

DANHARD, INC.

Danhard has designed **Air Shield** specifically for ambulance and emergency vehicles to help maintain a desired temperature. The air shield creates an air wall barrier similar to the entry way of a shopping center.

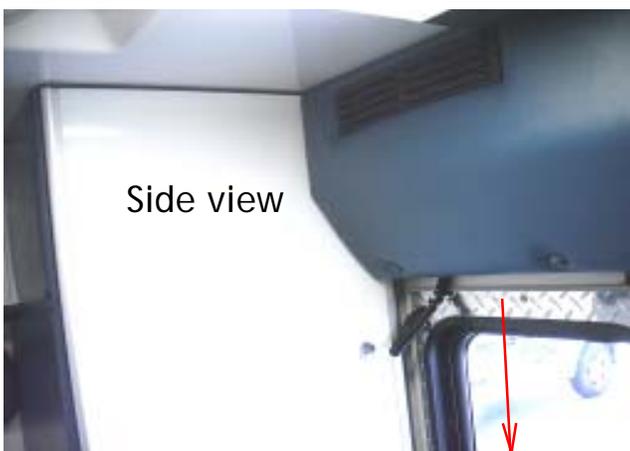

Advantages of an Air shield equipped ambulance are:

- 1.- Control of cabin temperature by creating an air curtain to keep the hot-cold air out while the doors are open.
- 2.- Keeps dust and insects out.
- 3.- Reduce entry of exhaust fumes when vehicle is in high idle mode.
- 4.- Cuts down the fuel consumption impact created by the A/C equipment.
- 5.- Reduces the wear and tear on your A/C equipment by minimizing the heat load.
- 6.- Increased head protection when exiting.

Specifications

Dim: 46" L x 9" H x 5-1/4" D

Weight: 12lbs.

Air Shield
